

Percent of Boys and Girls NOT Meeting Recommended Amounts of Important Nutrients

Top Food Sources and Percentage Contributed to the American Diet

The chart below lists the top six food sources of these important nutrients and the percentage each food provides to the American diet. Though data for Vitamin E and potassium are not available for the chart above they are included below because they are frequently mentioned as important nutrients for youth.

	#1	#2	#3	#4	#5	#6
